Objective

Highly motivated final year Computer Science student with strong programming, Data Structures, and Algorithms skills, eager to contribute to innovative projects and learn from industry leaders through an internship opportunity. Seeking an entry-level position to contribute to innovative projects while expanding expertise in modern front-end frameworks and Python-driven web development.

Experience

HCLTech — Industry Internship in LLM

Jan 2026 – Apr 2026

- Developed an end-to-end intelligent banking document fraud detection platform integrating advanced computer vision, Explainable AI (XAI), and secure API engineering[cite: 2].
- Benchmarked CNN, Vision Transformer, and hybrid CNN+ViT architectures for document authenticity, achieving high-performance fraud classification[cite: 2].
- Engineered a production-ready MLOps pipeline featuring FastAPI-based secure endpoints, real-time drift detection, model monitoring, and XAI-driven decision support via Grad-CAM visualizations[cite: 2].

Krutanic Solutions — Data Science Internship

Dec 2025 – Feb 2026

- Successfully completed a professional internship in the Data Science domain, demonstrating strong technical skills and professionalism.
- Implemented a complete machine learning workflow for a Car Price Prediction system using Pandas, Scikit-learn, and regression algorithms.
- Conducted a comprehensive Diwali Sales Analysis utilizing Matplotlib and Seaborn to uncover customer demographic insights and business trends.

Codsoft — Python Programming — Remote

Jun 2025 – Jul 2025

- Developed and deployed a interactive "Rock Paper Scissors" game.
- Completed additional development tasks including a Contact Book and a Password Generator.
- Received excellent feedback for contributions to tasks and projects over the 4-week internship program.

Internpe — Web Development — Remote

Jul 2024 – Aug 2024

- Created a dynamic calculator application utilizing Java programming, HTML, CSS, and JavaScript.

Projects

Vision Transformer (ViT) based Image Recognition with Explainable AI & Self-Supervised Pretraining

Final Year Project

- Developed an advanced image recognition system for banking fraud detection utilizing cutting-edge Vision Transformer (ViT) architectures.
- Implemented Explainable AI (XAI) using Grad-CAM visualizations to ensure model interpretability and transparency.
- Applied self-supervised pretraining techniques to significantly improve accuracy on limited datasets.

University Admission Prediction System

Academic Project

- Built a predictive machine learning pipeline to estimate university admission probabilities based on academic profiles.
- Utilized Python data science libraries (Pandas, Scikit-learn) for exploratory data analysis, data cleaning, and regression model training.

Handwritten Digit Recognition System

Independent Project

- Designed and trained a neural network model capable of accurately classifying handwritten digits from the MNIST dataset.

AI Chatbot for College Helpdesk

Independent Project

- Developed an automated conversational agent designed to handle and route common student queries efficiently.

Tic-Tac-Toe Game with AI Player

Independent Project

- Programmed a classic game featuring a built-in AI opponent utilizing logic algorithms for intelligent move selection.

Education

Aarupadai Veedu Institute of Technology

2022 – 2026

- BE - Computer Science Engineering
- CGPA: 7.8

Srinivasa Junior College

2020 – 2022

- Higher Secondary (11th, 12th)
- Percentage: 68%

Golden Rule English Medium High School

2019 – 2020

- Secondary School (10th)
- Percentage: 86%

Technical Skills

- **Python Proficiency:** Strong understanding of syntax, data structures (lists, dictionaries, tuples, sets), algorithms, and Object-Oriented Programming (OOP) principles.
- **Data Science & Machine Learning:** NumPy for numerical operations, Pandas for data manipulation, and Scikit-learn for machine learning algorithms.
- **Database Management:** SQL (Relational Databases): PostgreSQL, MySQL, SQLite.
- **Languages & Web Development:** Python, Java, C++, HTML, CSS, JavaScript.

Awards / Recognition / Certifications

- **TCS iON Career Edge - Young Professional:** Comprehensive course covering Communication, Presentation, Soft Skills, Resume Writing, and Group Discussion Skills. [\[LinkedIn\]](#) [🔗](#)
- **Getting Started with Data Analytics on AWS (Coursera):** Fundamentals of data analytics, ingestion, processing, storage, and visualization within the AWS cloud environment. [\[LinkedIn\]](#) [🔗](#)
- **Python Programming Virtual Program (Codsoft):** Received wonderful remarks for showcased skills from 05-06-2025 to 05-07-2025. [\[LinkedIn\]](#) [🔗](#)
- **Python for Data Science, AI and Development:** Foundational understanding of basic syntax, logic, exception handling, and classes.

Extracurricular Activities

Technical Initiatives & Hackathons

- **MongoDB Certifications:** From Relational Model (SQL) to Document Model; Connecting to MongoDB in Python (Issued Jul 2025, Credential ID: MDBwlo3ktd0he).

Co-Curricular Achievements

- **Certificate of Participation:** TATA Crucible Campus Quiz 2025.
- **Participant:** National Student Paryavaran Competition (NSPC) 2025.
- **Certificate of Merit:** CREA 2024 Cultural Fest, AVIT (III Prize in Cooking Competition).

Soft Skills

- Analytical Thinking, Creative Problem Solving, Critical Thinking, Strong Communication, Team Collaboration, Leadership, and Initiative in Group Projects.

Online Courses / Certifications

- Data Science Specialization – IBM (Coursera).
- Tata Group – Data Visualization: Empowering Business with Effective Insight Simulation.
